PROJECT SUMMARY

1. Title: - CDMS processing:

Duration: January 2024 to till date

Development Environment: JDK-1.8, Spring Boot 2.7.8, Maven 3.3.3, IntelliJ IDEA, log4J, Oracle, Spring Batch, Apache Kafka

Description:

CDMS Processing project focuses on providing end-users with a feature-rich functionality that empowers them to efficiently manage and process post-travel data. This functionality serves as a crucial component in enhancing the overall travel experience for users.

Roles & Responsibilities:

- Understanding functionalities from Requirement Specification.
- Develop Business logic of the application to create a API.
- Analyzing Solution Design & YML
- Creating JSON Request & Response for the Services.
- Writing Services using spring boot micro service app.
- Writing Controller and validators in Server side.
- Peer Reviews, Code Review Fixes and Sonar Fixes.
- Performance's testing using tool like Jmeter.
- JUNIT for the Services using Easy Mock.
- Defect Fixing for other project.
- Writing Batch Jobs
- Writing Apache consumers

2. Title: - RDMS processing:

Duration: June 2022 to Decmber 2023

Development Environment: JDK-1.8, Spring Boot 2.7.8, Maven 3.3.3, IntelliJ IDEA, log4J, Oracle, Spring Security

Description:

RDMS Processing project focuses on providing end-users with a feature-rich functionality that empowers them to efficiently manage and process post-travel data. This functionality serves as a crucial component in enhancing the overall travel experience for users.

Roles & Responsibilities:

- Understanding functionalities from Requirement Specification.
- Develop Business logic of the application to create a API.
- Analyzing Solution Design & YML
- Creating JSON Request & Response for the Services.
- Writing Services using spring boot microservice app.
- Writing Controller and validators in Server side.

- Peer Reviews, Code Review Fixes and Sonar Fixes.
- Performance's testing using tool like Jmeter.
- JUNIT for the Services using Easy Mock.
- Defect Fixing for other project.
