PROFESSIONAL SUMMARY

- **3.4 years** of experience in the development of Web & Enterprise applications with customer communication
- Full Stack Developer with 3.4 years of experience in developing Web and Enterprise applications with direct customer communication and cross-functional team collaboration. Familiar of working in Agile & Scaled Agile Framework.
- Proficient in building scalable applications using Java 17, Spring Boot, Angular 16, and MySQL, with strong exposure to Microservices and Micro-frontend architectures
- Hands-on experience with Core Java, Java 8, Hibernate, Spring MVC, Spring Core, Spring Boot and AWS services
- Proficient in using IDE like **Eclipse, IntelliJ IDE, STS**
- Experience in **Tomcat 8.0, WebSphere Application Server (IBM), JBOSS.**
- Worked with database **MySQL**
- Experience with CI/CD pipelines, using tools such as Jenkins, Git, Helm charts, and deployment on servers.
- Having good knowledge of adaptive communication, collaboration & team building skills with proficiency at grasping new technical concepts quickly and utilize the same in a productive manner.

CURRENT EMPLOYMENT

Organization: Rakuten Symphony
Period: January 2022 to till date.
Designation: Software Engineer

EDUCATIONAL SUMMARY

- Bachelor of Technology (B. Tech) from Chameli Devi Group of Institution under Rajiv Gandhi Proudyogiki Vishwavidyalaya Indore in 2022
- Intermediate Scholar's Den, Khandwa in 2017.
- Matriculation from Ben's Public School in 2015.

SKILL SET:

Programming Languages	**Java** [OOP, Collections, Generics, Synchronization, I/O, Exception Handling, Regular Expression, Lambda Expression]
Frontend Technologies:	**Angular 16**, TypeScript, JavaScript, HTML5, CSS3, Single-SPA (Micro Frontend Architecture)
DevOps & CI/CD Tools:	Jenkins, Docker, Kubernetes, Helm charts
Persistence Frameworks	Hibernate 5.0, JDBC & JPA
RDBMS	SQL

Version Control Tool	Github, Git
Cloud & Microservices:	Microservices Architecture, Vanna (Open-source DB Integration), Apache OpenNLP, Milvus (Vector DB)
Tools/ Technologies	JIRA, Jenkins, Putty , SonarQube, Swagger
IDE	Intellij , Eclipse 3.4 , STS

PROJECT SUMMARY

1. **Title: - Rakuten AI**
   Duration: March 2023 to till date
   Development Environment : Java 17, Spring Boot 3.x, Angular 16, OpenNLP, Vanna, MySQL, Docker Jenkins, Git, IntelliJ IDEA
   Description:
   Rakuten AI is an AI-powered enterprise platform that leverages machine learning and NLP to derive insights from large-scale business and customer data. It incorporates scalable microservices and modular frontends to streamline user interaction.
   Roles & Responsibilities:
   - Understanding functionalities from Requirement Specification.
   - Develop Business logic of the application to create a API.
   - Analysing Solution Design & YML
   - Led the development of micro frontend architecture, improving UI scalability and performance. Writing Services using spring boot micro service app.
   - Worked on Angular 16 to build dynamic UI components and integrate with backend APIs.
   - Peer Reviews, Code Review Fixes and Sonar Fixes.
   - Integrated Apache OpenNLP for text processing and Milvus for vector-based semantic search.
   - Created RESTful services using Spring Boot and integrated them with Kafka for async communication
   - Collaborated with the DevOps team on Dock erization and Jenkins pipelines. Defect Fixing for
   - other project.
   - Participated in agile ceremonies and maintained high sprint velocity with quality deliverables.

2. **Title: Financial Manager:**
   Duration: January 2022 to February 2023
   Development Environment: Java 17, Spring Boot, Angular 16, IntelliJ IDEA Git, Postman, Spring Security
   Description:
   A personal finance management application enabling users to control financial activities, track income and expenses, and identify areas for financial improvement.
   Roles & Responsibilities:
   - Understanding functionalities from Requirement Specification.
   - Develop Business logic of the application to create a API.
   - Analyzing Solution Design & YML
   - Built modules for budget planning and expense tracking using Angular 16 and Spring Boot
   - Integrated frontend with backend services using REST APIs for seamless user experience.
   - Peer Reviews, Code Review Fixes and Sonar Fixes.
   - Enhanced cost forecasting algorithms to assist users in future planning.

3. **Title: Global Price Master:**
   Duration: March 2023 to February 2024
   Development Environment: Java 17, Spring Boot, Angular 16, IntelliJ IDEA Git, Postman, Spring Security
   Description:
   This project focused on optimizing global procurement operations by providing a centralized platform for monitoring, analysing, and managing product prices across different regions.
   Roles & Responsibilities:
   - Understanding functionalities from Requirement Specification

- Led UI development efforts using Angular, ensuring seamless display and interaction of global pricing data.
- Integrated predictive analytics models to forecast pricing trends and support cost-effective decisions.
- Enabled real-time access to product pricing using microservices-based architecture.
- Participated in CI/CD pipeline setup using Jenkins and Docker for automated deployment.
- Used Git for version control and followed Agile methodology for sprint-based development
- Collaborated with cross-functional teams to design intuitive interfaces and reliable backend services.

PERSONAL PROFILE:

Date of Birth	: 31/10/1999
Gender	: Male
Languages Known	: English, Hindi,
Marital Status	: Single
